SYNOPSIS

The project "EASY ONLINE BANKING" is an online web application where the client can transact money from one account to another account to different banks. There are two different phases are used in this application. One is for the admin login and operations and other sides are for the client login and usages. The client can register their account with the use of his account number and pin.

With this registration, the user can login to a single account and can maintain or transfer money to many accounts and different banks. the client can also view his transaction details and deposit details. The admin can modify the client data and bank balance whereas the client can only view his account details. With one single login, the client can maintain all his bank details. There is no need of separate login for a different bank or account.
